Calas de Mallorca is located on the east coast, halfway between Porto Cristo and Portocolom. The center of the village is situated on a limestone rock formation, crossed by a multitude of caves at sea level. The infrastructure of the village is mainly oriented to tourism. There are several hotel and apartment complexes, as well as individual vacation homes and apartments. The center of Calas de Mallorca is affectionately known as the "Centro Comercial". It is the area of the locality that has a wide range of leisure facilities with various bars and restaurants, stores and leisure activities such as mini-golf. The administrative center of the locality offers public services such as a post office, a local police station, a tourist information office and a doctor's office. With Cala Domingo Gran, Cala Domingo Petits and Cala Antena, the village has a total of three large sandy coves, which have also given the village its name. All three coves are known for the excellent quality of their bathing waters. A well-paved coastal path connects Cala Domingo Gran with Cala Antena. The whole area is considered the most cave-rich region of Mallorca and is a popular place for snorkeling and scuba diving. However, most of the caves in this area have not yet been explored. The season in Calas de Mallorca usually starts in April and ends in October. During the winter months, most hotels, restaurants and stores are closed. Then you can find everything you need for your daily needs in Portocolom, Porto Cristo or Manacor, about 20 minutes by car. The price of the apartment is without furniture - but this can be bought additionally on request. Price on request !!!! IBI / Impuesto de Bienes Inmuebles: 320,- euro per year.
